

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

No amendments to the claims have been made.

1. (Original) Process for visual display of information in motor vehicles with an electronically controllable display, where the display is controlled in such a manner that at least two sets of information, having an interrelated effect, are displayed as a comparison by graphical representation, wherein the information is displayed at the same place alternating with the same type of graphics, but with different labels.
2. (Original) Process as claimed in patent claim 1, wherein the information is displayed with a bar graph.
3. (Original) Process as claimed in claim 1, wherein the information is displayed in different colors or intensity of illumination (light/dark).
4. (Original) Process as claimed in claim 2, wherein the information is displayed in different colors or intensity of illumination (light/dark).
5. (Previously Presented) Indicator for visual display of information in motor vehicles with an electronically controllable display, comprising means to control the display in such a manner that at least two sets of information, having an interrelated effect, are displayed as a comparison by graphical representation,

wherein the information is displayed at the same place alternating with the same type of graphics, but with different labels.

6. (Original) Indicator as claimed in claim 5, wherein the information is displayed with a bar graph.

7. (Original) Indicator as claimed in claim 5, wherein the information is displayed in different colors or intensity of illumination (light/dark).

8. (Original) Indicator as claimed in claim 6, wherein the information is displayed in different colors or intensity of illumination (light/dark).
